Equations as Relations & Functions

Solve each equation if the domain is $\{-2, 0, \frac{1}{3}, 1\}$. Write each answer as an order pair.

1)
$$y = 2x - 7$$

2)
$$y = 3x + 2$$

3)
$$y = 5x - 10$$

4)
$$y = x^2 - 3x + 10$$

5)
$$y = -2x + 8$$

6)
$$y = x^2 + \frac{1}{2}x - 2$$
